SUBJECT INDEX

	Page
Abstracts	259
Acid phosphatase	427
Acylpyruvase activity	125
Age, influence on susceptibility to lymphoid tumors	55
Aldolase, in serum and tissues in tumor-bearing animals	303
Alimentary tract, tumors of	173
Alkaline phosphatase	181
Amelanotic granules	325
Anatomy, of kidney of mouse	285
Anhydrase, carbonic	155
Blood histamine in leukemia and erythremia	379
Cancer, human—	
inhibition of hyaluronidase by serum	129
sunlight as a causal factor	247
Carbamates, in chemotherapy of leukemia	77, 391
Carbonic anhydrase content of tissues	155
Carcinogenesis, lipase activity during experimental epidermal	435
Carcinogenic hydrocarbons	173
Carcinoma—	
mouse	407
rat, transplantable	225
Castration, partial, of guinea pig	271
Catheptic activities of tumors and tissues of rats	39
Cells—	
growth of single tissue	229
mitochondria of normal and neoplastic	439
Chemical alteration of polysaccharide	13, 19
Chemotherapy of leukemia	77, 391
Cobalt, reversible and irreversible complexes	337
Cobaltodihistidine, configuration of	1
Colon—	
of rats ingesting motor lubricating oil	159
of well women	399
Cytoplasmic particulates in melanomas	311
Dehydropeptidase activity in tumors	389
Diet, effect on lipid and nucleic acid concentrations	47
Diethyl β-iodoethyl amine hydrochloride	261
Electron microscope, observations on mitochondria with	439
Enzymatic activities of granules of mouse melanomas	325
Enzyme systems, mucolytic	129
Epidermal carcinogenesis	435
Erythremia, blood histamine in	379
Esterase, histochemical demonstration of	415
Fibroids in guinea pig	271
Fowl tumors, agents causing	57, 69, 73
Frog kidney	111
Growth of single isolated tissue cells	229
Guinea pig, fibroids in	271
Histamine, blood	379
Histidine, reversible and irreversible complexes of	337
Hyaluronidase, inhibition of, by serum	129
Hydrocarbons, carcinogenic	173
Iodine, radioactive	13, 261
Iodopolysaccharide, effects in patients with tumors	19
Irradiation—	
whole-body with gamma rays on mice	133
local, on transplantable mouse carcinoma	407
susceptibility of mice to lymphoid tumors after	55
Kidney—	
of frog	111
of mouse	285
Lesion, adenomatous of colon of rat	159
Leukemia—	
blood histamine in	379
carbamates in chemotherapy of	77, 391
Lipase activity	435
Lipid concentrations, effect of diet and inhibiting agents on	47
Mammary tumor—	
agent	89
in C3H mice	119
Masculinizing ovarian tumor	277
Melanoma—	
Algire S91A partially amelanotic	311
amelanotic and melanotic granules	325
Cloudman S91 mouse	311
Harding-Passey mouse	311
Metastasis, pulmonary, in mice	407
Methylcholanthrene—	
effect on frog's kidney	111
tumors induced with, in mice	105
Mineral-oil, emulsions	173
Mitochrondria—	
relationship of isolated amelanotic and melanotic granules to	325
similarity to cytoplasmic particulates	311
Mouse (mice)—	
alimentary tract, tumors of	173
carcinoma, effect of local irradiation	407
C3H—	
backeross, tumors induced in	105
female, morphologic changes in organs of	119
mammary tumors in	119
hydrid, mammary tumors in	89
injected with diethyl β-iodoethyl amine hydrochloride	261
JK, tumors induced in	105
kidney of	285
mammary tumors in—	
C3H	119
hybrid	89
spermatogenic elements and interstitial tissues of testes of	133
susceptibility to lymphoid tumors after irradiation	55
thymoma—	
effect of diet and inhibiting agents	47
protein-fractionation studies of	43
tumors (*see* Tumors)	
N-acetyl-2-aminofluorene	149, 225
Nucleic acid concentrations, effect of diet and inhibiting agents on	47
Oil, motor lubricating	159
Ovarian tumor	277
Oxy-bis(cobaltodihistidine), configuration of	1
Oxygen, molecular, reversible and irreversible complexes of	337
Phosphatase—	
acid	427
alkaline	181
Pollenized food	119
Polysaccharide—	
from *Serratia Marcescens*	13, 19
tagged with radioactive iodine	13
Protein-fractionation studies	43
Pulmonary metastasis in mice	407

	Page
Radioactive iodine—	
diethyl β-iodoethyl amine hydrochloride prepared with	261
polysaccharide tagged with	13
Rat—	
catheptic activities in tumor-bearing	39
distribution of N-acetyl-2-aminofluorene in	149
lesions of the colon	159
transplantable tumors induced in	225
Serratia Marcescens, chemical alteration of polysaccharide from	13, 19
Serum—	
aldolase in	303
in human cancer	129
Spermatogenic elements of testes of mice, effect of radiation on	133
Sunlight, causal factor in cancer	247
Testes, effect of irradiation in mice	133
Thiouracil	201
Thiourea	201
Thymoma, mouse	43, 47
Tissue—	
acylpyruvase activity of normal and neoplastic	125
aldolase in the serum and	303
carbonic anhydrase content of	155
cells, growth of isolated	229
interstitial of testes of mice, effect of radiation on	133
normal and neoplastic, demonstration of alkaline phosphatase	181
of tumor-bearing rats	39
Tumor(s)—	
alimentary tract	173
-bearing animals, aldolase in serum and tissues of	303
-bearing rats, catheptic activities of	39
dehydropeptidase activity in	389
effects of iodopolysaccharide in patients with	19
fowl—	
desiccation of agents freed from extraneous proteins	73
isolation of agents by,	
chemical methods	69
differential centrifugation	57

○
